Website: W W W W contact@clapperapp.com : contact@clapperapp.com Ten 7, 2021 Version 8.3. 1 I was recruited for this application from being seen on a different platform in Yemen to I like to have an application that focuses on freedom of expression, political, views - things that many viewers don't want to see in other applications. This app will have the ability to content on these topics that others may address. On my other platforms, my content is not based on countrymen like this. These applications are created for the taps for which this application is specifically targeted. I like to get away from my other countrymen and have the ability to share my thoughts/beliefs here. I like having an option to like and not like. The reason I give four stars to For two things I don't like. The quality of a video I create and share here Horrible! The quality of the video appears to be illogical quality. 2-I will receive a notification, but I cannot update my feed when I try to see the comments/wastes. This application has great potential for advancement. Honestly I would not have known about this application unless I received a message. I've been clapping for months now. I like it so much. So different from other social communication uncles. This is the first social media application with the creation of video content that you hit on social media! Here you fight bullying the right way. They do not allow toxicity as in other media platforms. The Clapper allows the community to gather and allow our voice to be heard. To hello m of this, this application also m m Fun! The gifts in life are great, the music Only, the highlights during the fans Laughter and groups are fun! Not only have I met incredible acquaintances, but also I have made real friends that I can now talk outside the application. The application is approaching on your first year/anniversary. Yes there have been some flaws and some things that some OGs have had to adjust because of something that is out of Clappers control. However, to hello This application has grown and, in general, I like it very much! I hope that this application will continue to grow and hope to continue to be part of this incredible community of applause! I love the freedom of This is definitely my favorite thing in this application. So important! I enter here to listen to real news and that are not censored! I've really enjoyed it a lot, but there's room for improvement. I know this is the alternative to TikTok (thank God) but some of the bells and whistles are missing. I'd like to see more categories appear. There's so much to see in TikTok, I'd like to see more here. To be perfectly honest, TikTok was my cue to sing without having to post on Facebook or Instagram. Singing to strangers a lot easier than your friends, so I liked it, but there's not much o f that on the clapper. I love watching people display their talents too m, so I think it would be more fun if there was more of that too m. But I am loving the ability to be honest on this platform on politics, yes, but other things too Thank you. Clapper.
